

TUD 2025 Workshop on Meta-Analysis

Title

Meta-Analysis in Education: From Theory to Practice with R

Abstract

This workshop will guide you through the process of synthesizing findings from multiple educational research studies using meta-analysis.

We will cover key steps such as

- Understanding the organization of meta-analytic datasets
- Selecting an appropriate working model that represent the structure of a meta-analytic data set, including basic and advanced random-effects models (e.g., multilevel meta-analytic models, random-effects models with robust variance estimation)
- Identifying and explaining the variability in effect sizes
- Detecting and addressing potential publication bias in the research literature

In this workshop, we will utilize the R package “metafor” and supplementary packages for hands-on experience. Whether you are a researcher, statistician, or student, this workshop will equip you with the knowledge and tools to effectively analyze and synthesize meta-analytic data.

Teachers

Diego G. Campos (<https://www.uv.uio.no/cemo/english/people/aca/diegogc/>)

Ronny Scherer (<https://www.uv.uio.no/cemo/english/people/aca/ronnysc/>)

Course Preparation

Participants are asked to install the R software and Rstudio before the course. Installing the relevant R packages prior to the course is also recommended. These packages are as follows: metafor, clubSandwich, robumeta, dmetar.

Teaching Dates and Mode

20.-21.02.2025, 09:30-14:30, online and synchronous via Zoom

Day 1: <https://uio.zoom.us/j/69591164427?pwd=MnouSKZ0WvMoX7TZgrGv12iEZ3MEHo.1>

Day 2: <https://uio.zoom.us/j/66647379385?pwd=iaMc5ALsV4RFb6w0a77hXlu2IUUh91.1>
